Response Style Explained

No validity concerns were found for this report.

Participant Summary

User ID: Sally Sample
Age: 68
Gender: Female

Completion Date: January 15, 2013
Time to Completion: 13:45
Norm Type: General Population - Female, 60+ years
Norm Region: US/Canada

Inconsistency Index: 1

The Inconsistency Index is 1, indicating consistency in responses across pairs of items measuring similar content. However, you may want to examine the following item pair where inconsistent responses were provided (see Item Responses page for more details): 106&126.

Positive Impression: 1

Negative Impression: 1

Both the Positive and Negative Impression indices are less than 3. Responses are likely neither the result of an overly positive, nor an overly negative response style. You may want to ask:

"Tell me about your process for responding to the items."

"What did you think of the items? Were any particularly difficult to respond to?"

Item 133 (My responses to the preceding sentences were open and honest): 5

The respondent's response was: **Always/Almost Always.**

Omitted Items: 2% overall omission rate

Although there were a few missing responses, the overall omission rate is not a concern as it was relatively low and all scales could be scored. Note. The Item Responses page displays which item responses were omitted.

Response Distribution

The respondent tended to use the extreme ends of the scale. You may want to ask:

"How did you go about answering the items?"

"How have you used similar scales in the past?"

Do you tend to use the end-points of the scale?"

Responses

- ? = 2%
- 1. Never/Rarely = 24%
- 2. Occasionally = 8%
- 3. Sometimes = 5%
- 4. Often = 5%
- 5. Always/Almost Always = 56%

Leadership Potential

The EQ-i 2.0 subscales are strongly related to leadership competencies that in turn may be associated with productivity, decreased employee turnover, and increased efficiency. A leader who embodies the competencies below is more likely to increase work satisfaction, create trust, and foster organizational commitment and loyalty.

This page provides you with a leadership lens through which to view your EQ-i 2.0 results. There are four general competencies required of most leaders: authenticity, coaching, insight and innovation. The top six EQ-i 2.0 subscales (based on theory and research) that are associated with each competency are displayed below. High scores on the associated subscales help ensure optimal functioning in the competency area. Alternatively, if you score lower on a few subscales for a particular leadership competency, you can quickly see that this might be an area of challenge for you in your current leadership role. Focusing development efforts in these areas are likely to yield the greatest return in your growth as a leader.

Authenticity

An authentic leader serves as a role model for moral and fair behavior. A transparent approach commands esteem and confidence from employees.

Coaching

A leader who coaches effectively is seen as a mentor who supports employee growth. Employees are nurtured towards achieving their highest levels of performance.

Insight

A leader provides insight by sharing a purpose and hopeful vision for colleagues to follow. Employees are compelled and inspired to exceed goals.

Innovation

An innovative leader focuses on taking risks, spurring colleagues' ingenuity and autonomous thought. Knowledge is valued and challenges are viewed as learning opportunities.

Leadership Derailers

Your client has a **low risk of derailment** as he/she received above average results across all subscales shown on the right. High scores on these subscales indicate that your client is less likely to adopt a passive or avoidant leadership style. Because of high expectations placed on leaders, it is important to strive towards exceptional performance on these subscales in order to prevent moments where your client may avoid his/her leadership responsibilities.

Well-Being Indicator

Satisfied with life; content

How to Use this Page

In the EQ-i 2.0 model, Happiness is different than the other EI abilities in that it both contributes to, and is a product of, EI. As such, your client's result in Happiness can be used as a barometer of emotional health and well-being.

Although the causes and factors related to an individual's happiness extend beyond the scope of this assessment, it is important to examine your client's Happiness result in relation to the other EI subscales. For example, would strengthening lower subscales lead to improved Happiness?

Or will increased Happiness stem from working within the client's strengths and talents? In either case, the best way forward is as unique to each person as his or her own definition of Happiness.

The four subscales most often associated with Happiness are:

- Self-Regard
- Optimism
- Self-Actualization
- Interpersonal Relationships

Happiness

Your client's result in Happiness suggests that more often than not, a satisfaction is felt with life, and a general enjoyment of the company of others and work. Your client may:

- Have fun at both work and play while participating in enjoyable activities.
- Be seen by the team as likeable and pleasant to be around.
- Have to occasionally manage discontentment with certain aspects of life.

Although there are no low scores in any of the four subscales typically tied to happiness, nor in any other EI skill area, your client may benefit from ensuring development goals are linked to improving Happiness. Are there additional goals that your client can set to achieve things that are important, leading to an increased sense of well-being?

Self-Regard (120)

Happiness is a by-product of believing in oneself and living according to your own values and standards. Your client's high level of Self-Regard helps promote positive self-feelings and confidence, and can enhance life satisfaction and happiness. You might ask:

- How do you envision success in your leadership position? Are you reaching the pinnacle of success?
- What are some strategies you have used in the past (e.g., positive self-talk) to be confident and self-assured?

Optimism (121)

In the face of setback and disappointment, the ability to regroup and reclaim a happy state is contingent on one's level of optimism. Your client's results indicate that a high level of Optimism is displayed, and a positive framework is adopted during adverse conditions. This approach to life enhances and sustains pervasive feelings of happiness. You might ask:

- How does your optimism increase employee motivation and productivity?
- What can you do to impart this optimistic outlook in a transparent manner so that colleagues can benefit?

Interpersonal Relationships (122)

Your Interpersonal Relationships result indicates that your client has well-developed relationships that help to shield from the negative effects of life's daily demands. If maintained, these relationships help to enhance and sustain pervasive feelings of happiness. You might ask:

- Do you have a confidant outside of work who helps buffer any stressful or negative events that you encounter?
- How can you effectively leverage your network to maintain happiness in your work life?

Self-Actualization (125)

Happiness comes from a willingness to learn and grow on a journey aligned with your values. Your client's level of self-motivation and feelings of an enriched life ultimately drive life achievement and overall happiness. You might ask:

- Can you pinpoint the emotions you experience when you feel you are optimally using your talents?

■ Balancing EI

This section shows three related subscales for each of the fifteen subscales on the EQ-i 2.0. Below, you will find examples of feedback that you can provide to the respondent.

- Where a greater than (➤) or less than (➤) sign is shown, the subscale scores are significantly different and further investigation into these imbalances is recommended.
- When an equal sign (⚖) is shown, the subscale scores are not significantly different from one another and therefore are well balanced. In order to maintain this balance, you may want to guide

the respondent to watch for significant growth in one subscale over the other and consider ways that he/she can develop the subscales in tandem.

Please note that if you included this section in the respondent's report, the respondent will see only one subscale (the relationship with the greatest score discrepancy). All three relationships are shown here so that you may debrief the respondent on other areas that are out of balance. In addition to what is displayed in this report, you may want to explore other balances and imbalances in the respondent's profile that may lead to further EI development.

■ Self-Perception

Self-Regard (120)	⚖ Self-Actualization (125)	Your Self-Regard is in balance with your Self-Actualization.
	⚖ Problem Solving (118)	Your Self-Regard is in balance with your Problem Solving.
	➤ Reality Testing (132)	Your Self-Regard is lower than your Reality Testing. Remember that although input from external sources is important, self-regard is about your own evaluation of self-worth, and should not be overly influenced by external sources. Seek objective feedback, but give primary importance to your own sense of personal success.
Self-Actualization (125)	⚖ Self-Regard (120)	Your Self-Actualization is in balance with your Self-Regard.
	⚖ Optimism (121)	Your Self-Actualization is in balance with your Optimism.
	⚖ Reality Testing (132)	Your Self-Actualization is in balance with your Reality Testing.
Emotional Self-Awareness (127)	⚖ Reality Testing (132)	Your Emotional Self-Awareness is in balance with your Reality Testing.
	⚖ Emotional Expression (118)	Your Emotional Self-Awareness is in balance with your Emotional Expression.
	⚖ Stress Tolerance (122)	Your Emotional Self-Awareness is in balance with your Stress Tolerance.

Self-Expression

Emotional Expression (118)	 Interpersonal Relationships (122)	Your Emotional Expression is in balance with your Interpersonal Relationships.
	 Assertiveness (110)	Your Emotional Expression is in balance with your Assertiveness.
	 Empathy (126)	Your Emotional Expression is in balance with your Empathy.
Assertiveness (110)	 Interpersonal Relationships (122)	Your Assertiveness is lower than your Interpersonal Relationships result. Placing greater emphasis on interpersonal relationships than on being assertive may permit you to support those you work with. Make sure you give equal emphasis to standing up for what you believe in, and speaking your mind when it is important to do so.
	 Emotional Self-Awareness (127)	Your Assertiveness is lower than your Emotional Self-Awareness. Creating balance here will enable you to better use emotional information to guide your assertiveness. When you have strong feelings about something, you should be more inclined to behave assertively. When you feel less strongly, you can back off.
	 Empathy (126)	Because your Assertiveness is lower than your Empathy, you may place a greater emphasis on caring for others than you do on being assertive. It is important to recognize that it is possible to be empathic and assertive at the same time. Being sensitive to the feelings of others allows you to express your assertiveness in a way that will be received in the best manner possible.
Independence (118)	 Problem Solving (118)	Your Independence is in balance with your Problem Solving.
	 Emotional Self-Awareness (127)	Your Independence is in balance with your Emotional Self-Awareness.
	 Interpersonal Relationships (122)	Your Independence is in balance with your Interpersonal Relationships.

Balancing EI

Decision Making

Problem Solving (118)	 Flexibility (121)	Your Problem Solving is in balance with your Flexibility.
	 Reality Testing (132)	Your Problem Solving is lower than your Reality Testing. To balance these components, be cognizant of the role that realistic and objective information plays in your decision making process, and find a balance between collecting information and making a firm decision in a timely manner. Some decisions must be made before all of the facts are in, and other decisions can be deferred until more information is available. To balance this area, recognize these different situations and act accordingly.
	 Emotional Self-Awareness (127)	Your Problem Solving is in balance with your Emotional Self-Awareness.
Reality Testing (132)	 Emotional Self-Awareness (127)	Your Reality Testing is in balance with your Emotional Self-Awareness.
	 Self-Regard (120)	Your Reality Testing is higher than your Self-Regard. To align these components, set meaningful but attainable goals and base your self-assessment on the accomplishment of these goals. The use of objective, supportive feedback can be helpful.
	 Problem Solving (118)	Your Reality Testing is higher than your Problem Solving. Balancing these components requires attention to emotional information that can lead to timely decisions. Reality Testing is about being grounded and practical, however the best solutions involve integrating objective information with people factors, negotiating and managing emotional responses, and taking swift action when needed.
Impulse Control (109)	 Flexibility (121)	Your Impulse Control is lower than your Flexibility. It is important to remain open to new ideas and change, as long as changes are not made haphazardly without proper thought to the implications of the changes. Creating a balance between impulse control and flexibility can result in more efficient and effective actions.
	 Stress Tolerance (122)	Your Impulse Control is lower than your Stress Tolerance. The best decisions under stress are often made when you can remain "cool under fire" and not pressured into taking unnecessarily hasty action. Balancing your coping strategies with a deliberate and controlled behavioral style under stress can improve your overall performance.
	 Assertiveness (110)	Your Impulse Control is in balance with your Assertiveness.

Balancing EI

Stress Management

Flexibility (121)	 Problem Solving (118)	Your Flexibility is in balance with your Problem Solving.
	 Independence (118)	Your Flexibility is in balance with your Independence.
	 Impulse Control (109)	Your Flexibility is higher than your Impulse Control. To balance these components, avoid making changes without factoring in long-term considerations. Watch for others' reactions to the changes you bring about. If they aren't on board, it may be a sign that your changes are not well justified.
Stress Tolerance (122)	 Problem Solving (118)	Your Stress Tolerance is in balance with your Problem Solving.
	 Flexibility (121)	Your Stress Tolerance is in balance with your Flexibility.
	 Interpersonal Relationships (122)	Your Stress Tolerance is in balance with your Interpersonal Relationships.
Optimism (121)	 Self-Regard (120)	Your Optimism is in balance with your Self-Regard.
	 Interpersonal Relationships (122)	Your Optimism is in balance with your Interpersonal Relationships.
	 Reality Testing (132)	Your Optimism is lower than your Reality Testing. To balance these components, use objective information and facts to inform, strategize, and inspire dreams and visions for the future. Although there are times when you must change course entirely, don't give up if there is still a reasonable chance to succeed. Consider all possible courses of action before revising goals.

Item Responses

Responses are shown by item on the following two pages. Items are shown by subscale and are exactly as they appeared on the assessment. Please note, although some items use reversed language, the higher the response indicated, the more frequent is the behavior.

Responses to each item were provided using the following rating scale:

1= Never/Rarely; 2=Occasionally; 3=Sometimes; 4=Often; 5=Always/Almost Always.

Action Plan

The steps your client takes towards achieving his/her EI goals will determine whether or not success is realized. Use this step-by-step activity plan to help guide your client closer to his/her goals. Remember to use the **SMART** goal setting criteria for each goal.

SPECIFIC
MEASURABLE
ACTION-ORIENTED
REALISTIC
TIMELY

Write down up to three EI skills or behaviors that your client would like to further develop (e.g., “reflective listening” to build empathy, or “recognizing how my body reacts to stress” to raise emotional self-awareness). The **SMART** goals that your client outlines in the template should help to strengthen these EI skills and behaviors.

- 1.
- 2.
- 3.

Write down up to three overall qualities that your client would like to have (e.g., integrity, providing clear leadership, team player, clear communicator). In some way the goals you outline in this action plan should help your client achieve the overall qualities he/she identified.

- 1.
- 2.
- 3.

Transfer your client's **SMART** goals into the action plan template below.

SMART Goal	Time Frame	Benefits	Measure of Success	Support and Resources Needed	Potential Barriers
Practice active listening	Today, especially in one on one meetings with my direct reports	Improved interpersonal relationships, empathy with my team. Increased employee engagement.	- Feedback - 360 results increase	Direct feedback from my team	Obtaining honest feedback can be difficult. Time – don't cancel one on one meetings – demonstrate the importance of regular touch points

■ EI Development Commitment

A Development Commitment is a tool to help hold your client accountable for accomplishing the goals outlined in his/her action plan. As we all too often know, our plans for personal growth and development often fall by the wayside when we get back to work and our organization's demands win the competition for time and attention.

By outlining your client's objectives here, and ensuring that your client does the same in his or her report, you help your client to be more accountable to reaching their professional objectives.

Coach's Guide to an EQ-i 2.0 Debrief Session

Preparing for the Debrief

Review the Report

- ☐ Review the Response Style Explained page and look into any flagged areas.
- ☐ Review the Total EI score, Leadership Potential page and composite scores. Where does the client fall in relation to the norm group? Is the client's score in the low, mid or high range?
- ☐ Review the individual subscales and patterns. Which particular combinations of subscales are striking to you? Which do you want to investigate at the item level? Which subscales would have the greatest impact on your client's leadership?
- ☐ Review item scores for any particularly high or low scores.
- ☐ Examine the Balancing EI page. What stands out in this client's results? Which subscales do you need to look at more closely? What might be some challenges associated with the results?
- ☐ Make notes on areas you are curious about.
- ☐ What is your overall impression? What will you want to keep in mind as you go through the debrief?

Conducting the Debrief

Phase	Points to Keep in Mind	Questions to Ask
1. Build Rapport The first step is to create a sense of ease and establish common goals between you and your client.	<ul style="list-style-type: none"> <input type="checkbox"/> Explain how the feedback will be structured and how long it will take. <input type="checkbox"/> Ask what the client wants to get out of the session. <input type="checkbox"/> Remind the client of the confidentiality agreement and who "owns the data". <input type="checkbox"/> If appropriate, show the client a sample report so that they are prepared for what they will be seeing in their own report. This may help them understand what the results will indicate before they actually see them. <input type="checkbox"/> Remind the client that this is a self-report and that it is a "snapshot in time". It is a starting point for discussion, not the end of the investigation. 	<ul style="list-style-type: none"> <input type="checkbox"/> How are you feeling about this meeting? <input type="checkbox"/> What was your experience in taking the assessment? <input type="checkbox"/> Probing questions: were you alone, did you do it at the beginning of the day, end of the day; do you recall any items that you had difficulty with or that were not clear to you? <input type="checkbox"/> Is there anything significant going on in your life that may have affected how you responded to the items? <input type="checkbox"/> How did you find the items themselves? Anything you found odd or curious? <input type="checkbox"/> Do you have any questions or comments before we go over your profile?
2. Validate Facts Next, establish the "truth" of EQ-i results in the eyes of your client.	<ul style="list-style-type: none"> <input type="checkbox"/> Give definition of EI and recap details of the EQ-i 2.0. <input type="checkbox"/> As you can see, the bars represent how you responded to the items on each scale of the EQ-i 2.0. <input type="checkbox"/> The bars that are in the middle range show that compared to the norm group, you answered the items in a similar way. <input type="checkbox"/> Bars to the left indicate decreased use of behaviors related to the scale. <input type="checkbox"/> Bars to the right indicate increased use of behaviors related to the scale. 	<ul style="list-style-type: none"> <input type="checkbox"/> What is your first impression of this profile? <input type="checkbox"/> Does this profile look accurate to you? <input type="checkbox"/> What surprises you? <input type="checkbox"/> Where would you like to focus first? <input type="checkbox"/> What questions do you have about your results? <input type="checkbox"/> Can you give me an example of how you use that skill? <input type="checkbox"/> Would you say this is a real strength of yours? <input type="checkbox"/> This suggests to me that _____. Is that true of you?

Coach's Guide to an EQ-i 2.0 Debrief Session

Phase	Points to Keep in Mind	Questions to Ask
3. Discovery In the third step, the goal is to acquire a full understanding of any challenges that may be present. As a coach, you want to probe for details to clarify your client's thoughts, feelings, opinions, and expectations.	Use the Follow-Up Questions pages to get a better understanding of how your client demonstrates the skills related to specific subscales.	<input type="checkbox"/> What areas stand out for you as things you'd like to focus on? <input type="checkbox"/> How satisfied are you with that? <input type="checkbox"/> What concerns do you have with that situation? <input type="checkbox"/> Why do you think that is so? <input type="checkbox"/> What is the message here? <input type="checkbox"/> What gets in your way in this area? <input type="checkbox"/> Why is that so frustrating? <input type="checkbox"/> How do you see that contributing to your success? <input type="checkbox"/> How do you see that holding you back? <input type="checkbox"/> Do these areas interfere with achieving your goals in any way? <input type="checkbox"/> How might a decreased use of these types of behaviors help you in your role?
4. Establish Relevance Next, activate interest in finding a solution and gauge the possibility and desire for change.	Connect the importance of your conversation to your client's work, and role as a leader.	<input type="checkbox"/> It sounds like it is important for you to ____ as a leader. Is that correct? <input type="checkbox"/> How long have you been doing that? <input type="checkbox"/> To what extent is that effective for you? <input type="checkbox"/> How is that behavior working for you? <input type="checkbox"/> What impact does that have on the people you lead?
5. Explore Benefits The goal here is to help your client become aware of the benefits of change by considering the benefits of a particular solution.	Pose hypothetical, job-related situations to help your client imagine a new state of behavior and its outcomes. "If... then" questions help the client project an ideal state of operating effectively.	<input type="checkbox"/> What is the ideal situation here? <input type="checkbox"/> If you had a choice, what would you do? <input type="checkbox"/> If you didn't have to deal with ____, how would things be different? <input type="checkbox"/> What kind of support would be helpful? <input type="checkbox"/> If you were going to work on one or two areas, which one(s) would you choose? <input type="checkbox"/> What benefits would you like to achieve by improving in those areas?
6. Transition The last part of the session involves discussing next steps and establishing the client's commitment to continue working with you.	Ask transition questions to remind your client of time limitations to ensure the majority of areas you both want to discuss are addressed. "How" questions help work out the logistics of your future relationship. If appropriate, complete the Development Action Plan together with your client.	<input type="checkbox"/> It sounds like this is an area you'd like to work on. What are some ways that you might be able to further develop in this area? <input type="checkbox"/> What is one thing you can do to further develop this skill? Questions to help close the conversation: <input type="checkbox"/> How would you like to move forward? <input type="checkbox"/> How committed are you to your development plan? <input type="checkbox"/> If you're not completely committed, what do you need to do to get there? OR What do you need to change in your development plan in order to be fully committed? <input type="checkbox"/> How will you remain accountable for developing in this area? <input type="checkbox"/> I propose that we _____. Does that sound good to you? <input type="checkbox"/> What outstanding questions do you have?
